Elliptical table bases in straight-cut American white oak veneer and brushed aluminium laminate

Bespoke brushed aluminium, base mounted power data module

Demo room meeting table

5.8m table with straight and circular ends finished in straight-cut American white oak veneer with undercut chamfered solid oak edging and LED backlit white 'low iron' sandblasted glass central feature panel

"It was wonderful to see our new table installed...by very skilled fitters in no time at all, the service was both quick and professional. With one of the fitters being one of the makers of the table, we felt very well looked after. I would highly recommend Clarke Rendall for any bespoke furniture requirements and would not hesitate to use them again."
