

"Building long term relationships and trust is always foremost in our mind when working for our clients. Selecting the right manufacturing partners is key to providing great service and after sales care. Clarke Rendall was chosen for this project as they mirror our commitment to their clients. From the initial design right through to delivery was seamless. Many thanks indeed."

Forbo camel 4171 desktop with power/data interface, 2mm ebony timber lipping and black powdercoated steel base

4. DDA Study Table

Forbo camel 4171 push button, height adjustable desktop with 2mm ebony timber lipping and black powdercoated steel base

A study in flexibility

This suite of study areas for the **University of East London** called for a robust and highly practical furniture solution. High quality materials and finishing were also prerequisites in order to reflect the overall standard of learning at this newly redeveloped Campus in Stratford.

Working closely with **Globe Office Solutions** and the University, **Clarke Rendall's** design team played a key role from the outset in ensuring the client's demands were all met including tamper proof power/data interface and a push button adjustable height DDA module.

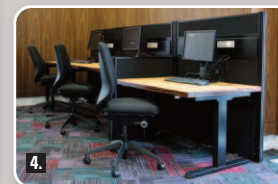

Clarke Rendall's showroom partners **Koehl** seating supplied open plan area seating to compliment several **Corian®** occasional tables.

Another innovative aspect of this scheme is the highly versatile suite of folding tables for the meeting area. These beautifully simple units deliver true flexibility by allowing rapid transformation of a limited area for the most efficient use of space.

Call our design team on **01908 391600** for more information on how to bring this level of quality, versatility and reliability to your next project.

Clarke Rendall's contribution to the project

- 7 No. 1200 x 700 flip top meeting tables
- 1 No. 2800 x 1200 meeting table with power/data
- 2 No. 1200 x 600 tables
